

DSS Insurance Capture Buffer™

Insurance Card Scanning & VistA Buffer File Update

Speed - Paperless Work Flow

Accuracy- Reduce Insurance Buffer File Errors

Reporting - Audit by Patients, Clerks and Date

Simplified Process for Entry Clerks enhances compliance:

- ◆ Identify the patient by appointment and location
- ◆ Alerts entry clerks to update insurance information
- ◆ Scan the insurance card with a small desktop scanner
- ◆ Optical Character Recognition (OCR) captures patient insurance information
- ◆ OCR to capture data directly from insurance card image
- ◆ Saves the image for the insurance verification clerk

Comprehensive and Accurate Process for Verification Clerks:

- ◆ View work list of patients with recently scanned cards
- ◆ Compare existing VistA data against scanned insurance card image
- ◆ Save updated data to VistA Insurance Buffer File
- ◆ Audit Reports by Workload; Patient, Clerk, Edits, Time and Date

DSS ICB

Patient insurance information is electronically captured by the Check-in Clerk.
