DSS Release Of Information ROI

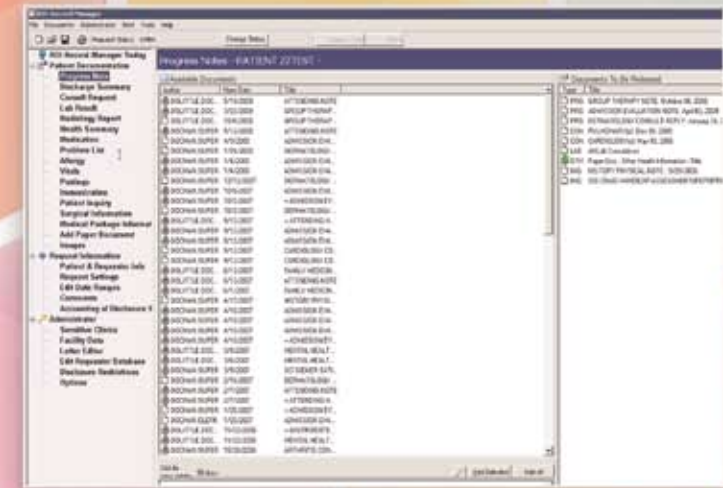

ROI improves reporting workflow, reduces manual tracking of incomplete requests, complies with HIPAA requirements and improves reporting turnaround times.

DSS Release Of Information, automates the entire process of managing Electronic Medical Record ROI requests. DSS ROI is a proven tool for improving efficiencies and reducing expenses.

Building a Better Workplace Through Technology

DSS Release Of Information reduces ROI request turnaround time. As the user selects patient information to be released, the ROI tracking database becomes populated. This easy to use system provides the ROI clerk with a systematic method of releasing and tracking all ROI requests. With just a little training, ROI management can be seamlessly integrated into your electronic workflow solution.
