

Infusion Therapy Manager

Our VistA Chemotherapy Manager users asked. We listened.

Infusion Therapy Manager (ITM) provides a smarter, more intuitive user experience to achieve far greater chemotherapy workflow efficiency. A streamlined navigation empowers ITM users with better focus and significant time-savings. This all-new design is driven by addressing key performance indicators and specific pain points shared by our oncology care teams.

ITM is not just a superior tool – it is the tool our users asked for.

Workflow categorization for evidence - based treatment plans and medications

- Evidence based treatment plans categorized according to administration
- One screen display for faster access to treatment plans
- Order details at a glance
- Easy order editing
- Easier access to previous treatment plans
- Comprehensive printed drug orders
- Improved TIU Note formatting
- Clear and concise view of order checks

Intuitive Order Processing

- Validated orders executable directly from the application
- Enhanced communication between user groups
- Sign order status

Key Metrics Reporting

- Captures metrics, like drug utilization reports, for greater cost containment

All-New Nursing and Analytics Modules

- Flowsheet
- Pre/Post Treatment Assessment
- Free texting capability
