

Clinical Notes Templates Plus

Reports slowing you down? We can fix that.

As health care becomes increasingly value-based, complete and accurate patient care documentation becomes even more critical to ensuring high quality patient care. But amid growing industry regulations, streamlining your documentation can be a challenge. That's why Veterans Administration facilities across the country use DSS Clinical Notes Templates Plus. Fully VistA- and CPRS-integrated, to increase workflow efficiencies and reduce manual processes, CNT Plus is the fastest, most comprehensive, and cost-effective software solution for mapping and recording health Patient Care Encounter (PCE) Items, and clinical reminder data to VistA. No other solution comes close.

Faster Mapping

CNT Plus includes hundreds of time-saving, specialty-specific templates mapped to PCE Items in VistA, and note titles and consults in CPRS. Mapping tasks that once took Clinical Applications Coordinators days, or weeks to complete, now take hours. Computer-assisted templates are incorporated for real-time, provider feedback. And four additional clinical note templates can be created each year at no additional charge.

Built for EHR Modernization

DSS CNT Plus is a modern COTS application, leveraging and extending the capabilities of the core VistA. Designed to isolate end-users from these changes to the core of VistA and CPRS, CNT Plus uses approved communication and integration technologies, that will persist throughout the EHR modernization process. End-users can direct future enhancements to the application without being constrained by or dependent on changes to VistA and CPRS. Future enhancements will be directed toward mobile applications, giving users the ability to use multiple input platforms (web, iOS, Windows).

The Most Comprehensive Solution on the Market

CNT Plus improves patient outcomes, enhances the continuum of care, increases patient safety, improves communication within patient care teams, and streamlines revenue-cycle processes. All while meeting CARF, HIMSS and CMS guidelines, as well as The Joint Commission standards.

CNT Plus Benefits at a Glance

- + Complete VistA and CPRS integration
- + Hundreds of time-saving, specialty-specific templates accessible to VistA and CPRS
- + Realistic graphical illustrations of the body for wound assessment
- + Automatic calculation of assessment scores
- + Meets all CARF, HIMSS and CMS guidelines, as well as The Joint Commission standards

Document Storage Systems, Inc. (DSS) is a catalyst for health care innovation, keeping pace with evolving technologies as a solutions provider, systems integrator, and services contractor to the Department of Veterans Affairs. DSS is committed to assisting VA in its High Reliability Organization journey and delivering care quality for Veterans by meeting top initiatives, changing regulatory requirements, and implementing enhanced business transformation across VA enterprise.
