Procedure Suite Manager - Anesthesiology

See Surgical and Procedural Cases at Once

In today's operating rooms at the Veterans Affairs Medical Centers, anesthesia care still depends heavily on fragmented communication – paper notes that can be misplaced, phone calls that interrupt critical moments, and whiteboards that only reflects a snapshot in time. These disconnected tools create gaps between pre-op, intra-op, and post-op teams – increasing the risk of miscommunication, delays, and preventable errors.

Procedure Suite Manager for Anesthesia turns communication and clinical workflow pain points into dynamic, team-driven coordination, enhancing patient safety and focus on care.

Track Staffing Needs Online

Procedure rooms see high amounts of case turnover and schedule changes. Planning tools let schedulers and managers move anesthesia staff between procedures and ORs. Clinical staff can track and coordinate anesthesia needs from their desk.

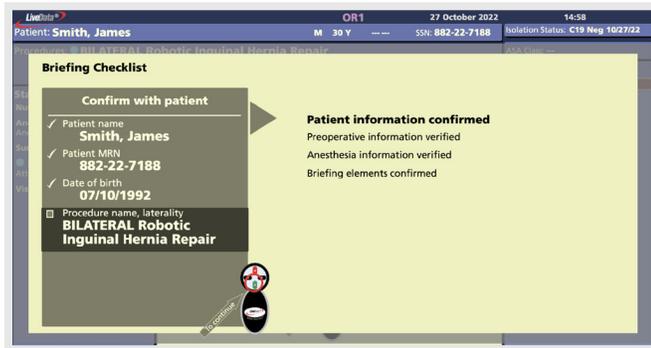

Display Boards Keep Everyone Informed

Is an anesthesia provider required? Now you know at a glance. All clinicians can see the hospital's schedule on award-winning real-time digital displays.

Schedule More Cases, Faster

LiveData tools allow clinic schedulers to view and request open slots, before waiting for the hospital to reach out or respond. Additional workflow tools automatically coordinate preop workups, avoiding cancellations.

Customized Briefings Inside the Procedure Room

Take timeouts and anesthesia preparation seriously - and enter details automatically - with digital checklists, a Joint Commission Leading Practice.

Anesthesiologist-in-Charge? Take charge.

With Procedure Suite Manager, LiveData's #1-Rated OR Management Platform[1] extends to Procedure Rooms. Featuring a coordinated, integrated calendar for anesthesia, it unites your same-day and advance planning across the OR and procedure suites.

Replace disconnected paper, phone, and whiteboard communications with a solution that anyone involved with anesthesia can use. They'll easily keep track of staff locations across surgery and procedure rooms, and cut back on the work needed to shuffle staff around. You and your team can always recognize where you're supposed to be.

Easy to implement and compatible with leading EHRs, LiveData delivers ROI to over 85 hospitals across 44 states. Put anesthesia planning front and center — with the tools your team needs to stay efficient, prepared, and informed.

Working Together For Those Who Serve Our Veterans

Document Storage Systems, Inc. (DSS) is a catalyst for health care innovation and digital transformation, helping the Department of Veterans Affairs as a SaaS and cloud service provider, and solutions integrator. DSS is committed to assisting VA in its highly reliable care delivery for Veterans by meeting top initiatives, changing regulatory requirements, and implementing enhanced business transformation across the VA enterprise.

LiveData develops and deploys surgical workflow solutions for operational efficiency and patient safety. Surgery departments using LiveData PeriOp Manager have documented significant improvements in Key Performance Indicators including block utilization, case scheduling accuracy, first-case-on-time-starts, cancellations, and turnover.
