

# Caribou Community Living Care (CLC) Suite

Comprehensive resident care

Provide the care your residents need to feel more at home.

Caribou CLC Suite offers end-to-end automation of resident care workflows with a wide array of reporting to keep everyone and everything on track. If a resident is declining, and demands a higher level of care, Caribou CLC Suite alerts users and empowers them to take appropriate action, capturing everything for reporting and reimbursement.

Care planning and management, including discharge planning is simple and streamlined. In addition to a robust library of care templates, Caribou CLC Suite care plans are customizable to meet the unique demands of every facility and resident.

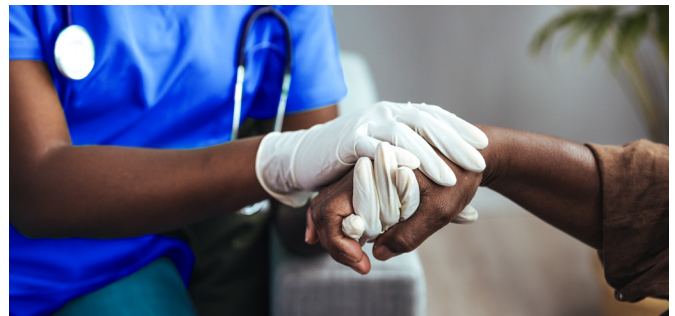

## Automated Resident Care

A minimum Data Set (MDS) reporting template allows for data input with easily accessible reports to assist in accurately updating each resident's MDS assessments, with up to date CMS standards and rules.

Quality Measures Reporting provides facility wide data related to the MDS input for each resident. This report is calculated based on the dates selected for each report, making it easy at a glance to improve each quality measure in a timely manner and support optimum care and ratings.

Caribou CLC Suite leverages data to provide critical insights about residents, and clear oversight of facility activities as a whole. Enhanced communication empowers care teams to work smarter together and encourages better engagement from residents and their families.

Caribou CLC Suite integrates seamlessly with VistA and Cerner Millennium

## Features at a glance

+ Web-based application

+ Intuitive, user-friendly interface

+ Administrator-definable user roles and access

+ Easy point of care charting

+ Simple, color-coded assessment tracking

+ Robust reporting functions
