

# LiveData PeriOp Manager™

A system of engagement to optimize surgical workflows

**LiveData PeriOp Manager™** provides perioperative situational awareness via real-time data to improve surgical workflow, resulting in improved patient safety, increased efficiency, and enhanced patient and staff satisfaction. Designed with feedback from clinicians at leading hospitals across the country, PeriOp Manager has been proven to help clinical teams complete more surgeries per day with the same scheduled staff and resources.

## LiveData PeriOp Planner™ Scheduling and block utilization

Displays a virtual appointment book with daily schedules of operating rooms, blocks, and cases, making it easy to visually plan and manage the day's case schedule for each surgical block. Block management tools within Planner allow Operating Room (OR) managers to fully control their block schedule through a primary block schedule along with weekly block overrides for fine-tuning. An interactive, searchable checklist provides a customized preoperative workup for each patient's journey. This trackable checklist keeps patient requirements in sync, so patients and providers can be confident in scheduling, and no patient preoperative step is missed.

## LiveData PeriOp Manager™ Day of surgery

Includes the dynamic digital display of surgical status, one-click entry of patients' surgical milestones in the OR, views into preop patient readiness, customizable automated updates to patients' families based on real-time data, and embedded electronic surgical time outs.

## LiveData PeriOp Manager Analytics™ Trusted data at your fingertips

Puts surgical data into your hands. Key metrics are available on dashboards that are updated daily. Analytics also offers a roll-up view to see the performance at hospitals across a Veterans Integrated Services Network or VISN. One-click data entry in the OR creates trusted key analytics entered in real-time. All this transforms real-time operational data into actionable intelligence for smoother perioperative operations.

### Working Together For Those Who Serve Our Veterans

**Document Storage Systems, Inc. (DSS)** is a catalyst for health care innovation, keeping pace with evolving technologies as a solutions provider, systems integrator, and services contractor to the Department of Veterans Affairs. DSS is committed to assisting VA in its High Reliability Organization journey and delivering care quality for Veterans by meeting top initiatives, changing regulatory requirements, and implementing enhanced business transformation across VA enterprise.

**LiveData** develops and deploys surgical workflow solutions for operational efficiency and patient safety. Surgery departments using LiveData PeriOp Manager have documented significant improvements in Key Performance Indicators including block utilization, case scheduling accuracy, first-case-on-time-starts, cancellations, and turnover.
