

# Easy Creation of Custom VistA Data Reports

Running FileMan reports is no easy task. With thousands of data field options and numerous regulatory reporting requirements, this process can be as time-consuming as it is complicated.

DSS Data Miner, a VistA-integrated module, empowers users to save time by providing an easy to use interface to streamline creating real time VistA data reports. Everyone from health care providers to administrative, IT, Managerial Cost Accounting, and Analytics staffs can quickly and easily evaluate quality measures via robust, custom enterprise reporting.

## Data Miner Makes All the Difference

- + Easily Create and Customize Reports
- + Schedule Monthly, Weekly and Daily Reports
- + Customize Permission Controls
- + Export data to Excel, PDF or Print
- + Produce most reports in a single page

## Functionality at a Glance

- + Easily add, edit, print, and search VistA data
- + Prioritize the order of data elements with simple parameter settings
- + Mark reports public or private to limit access
- + Scroll onscreen output for all reports on any compatible device
- + Export tools for outside applications such as PC spreadsheets and databases
- + Save report parameters for future use
- + Sort, group, and filter results via a robust data grid
- + Schedule reports during non-peak hours to avoid disrupting other mission critical data processing within VistA.

DSS is a leading health information technology (HIT) software development and systems integration company. With more than 20 years of experience, DSS provides optimum VistA-based EHR solutions to hospitals and health systems of all types of specialties. DSS has extensive experience working with federal, private and public healthcare facilities to modernize their legacy systems and improve efficiencies for clinical and administrative users. DSS is an active member of the Open Source Electronic Health Record Alliance (OSEHRA) organization.
